

NOW Reach Take control of your phone system

A cloud communication system puts you in control of your phone system. With a self-service portal that allows you to add or make changes to users, set holidaying scheduling and call routing, your system can grow together with your company.

With softphone and mobile options, your phone system can now stretch beyond the traditional desk phone.

Pricing from

\$18

per user, per month

Choose your way of working

Are you already working a lot at the computer?

With our Softphone, you will get telephony functionality, on your computer, via a user-friendly interface. Use the mobile app and get your entire office phone system, directly onto your smartphone.

Prefer a more traditional approach and want a desk phone?

No problem.

If different colleagues have different needs, then you can mix these solutions so everyone can work the way they want to.

Benefits of NOW Reach?

Maximum control over the management of phone systems with simple self-service administration, support, and reporting.

Intelligent call routing that allows administrators and business users to automatically control how inbound and outbound voice calls are handled.

Holiday scheduling allow easily schedule call routing for holidays.

Easy deployment that can get you up and running on the same day. Desk and DECT (cordless) phones are ready to use, when plugged into an Internet port.

Improved customer experience with Call Centre Lite.

Call reporting for identifying call trends and abandonment rates.

REDUCED COSTS

moving your PBX to the cloud removes the high cost of onsite PBX setups

FLEXIBILITY

desk phone, softphone, and mobile options available or a combination to suit you

BUSINESS CONTINUITY

fully redundant cloud architecture
