

**NOW**

# Business broadband & calling

Businesses rely on broadband now more than ever. Whether you're using the internet to sell to customers, collaborate with partners, or keep teams connected, you need proven performance. With ADSL, VDSL, or Fibre, we have a connection for every business. Some businesses rely heavily on internet connectivity and standard broadband services may not be the right fit. NOW's Premium Business broadband leverages UFB's Bitstream 3A or dark fibre technology.

It goes without saying, communication is at the heart of any great business. Communication should be straight forward. Kiwi businesses still rely on the basics of communication. We have the expertise to give you voice calling, how you want it, where you need it.

Bundle your phone and broadband needs to simplify your connectivity.

## TOLL FREE & CALLING

From a basic phone line to unified communications for an entire organisation. Our products are built to flex and scale to your growing needs. With free local calling and competitive calling rates for national and international, business calling applies to the following NOW telephony services:

- Unified Communications and IP Telephony
- MS Teams calling
- From simple to advanced omni channel contact centres
- SIP trunking for companies with their own PBX
- NOW Reach cloud PBX
